

My name is Amar Chowdry, i own 85 achers of land in Sidney, NY. i will be affected by this pipeline project, I have to respectfully have to disagree with this project. I am planning to start a livestock farm soon. i am very concerned about this popultion causing and destroying of good fram land in the area. These greedy Corp. have no interest with its own people and its owns country. They will most likely export this energy to the highest bidder and that could would be a foreign country. You have job to protect your own people and not the greedy Corp. take for example the bail outs of the the big banks, with good came out it. The tax payers were force to bail them out in return banks hit its own customers with fees and cancel lines of credits for small bussiness. Your salaries and benefits are paid by tax payers like me and other people in Sidney, NY. I and other land owners will resist and started a process of contacting the right people in media and polictical offices, should you deceide to ignore the will of the people. Thank you and would like a respond back.

Amar Chowdry
